JD: Software Engineering Intern

About OLX

OLX is the world's leading classifieds platform & online marketplace with a strong presence in more than 41 countries and serving more than 330 million users around the globe. The OLX Group includes brands like OLX, Avito, letgo, dubizzle, storia, stradia, among others. OLX is a Naspers company. Naspers is a global internet and entertainment group and one of the largest technology investors in the world.

OLX is looking to hire Interns for its Global Engineering function based out of Gurgaon (Delhi NCR). As *a Software Engineering Intern*, you will be a part of the Global Technology team that is building the next generation of best-in-class mobile experiences for OLX markets across the globe. During the internship, you will get an opportunity to work closely with key stakeholders in the organization & contribute in real-life, strategic projects for OLX aimed at launching delightful features and enhancing the existing buy and sell experience on OLX for millions of global users.

What We Offer:

- Well paid, full-time internships in the heart of the software industry.
- Exposure to a fast-paced, yet fun, global culture.
- A chance to work with world-class experts on challenging projects.
- Opportunity to provide meaningful contributions to a real system used by customers.
- High level of access to supervisors (manager and mentor), detailed direction, feedback throughout your internship, and a final evaluation.
- Stuff that matters: treated as a member of the OLX team, included in company meetings/activities, flexible hours, casual dress code, catered lunches & candy corner, TT tables, company outings and much more.

What We Expect:

- Desired class level: 3rd/4th year Undergraduates.
- Desired majors: Computer Science, Physics, Math, or related field
- When: ASAP 😊
- Duration: We recommend 10-14 weeks, but no less than 8 weeks.
- Excellent programming skills in any object oriented language.
- Knowledge of data structures and algorithms.
- Strong problem solving and ability to learn quickly in a dynamic environment.
- Experience with working as a part of a team.
- Dedication and passion for technology.

What You Will Learn/Gain:

- How to build reliable, scalable and trustworthy software systems.
- Exposure to Data Management and Data Engineering
- Hands on experience to SDLC using SCRUM
- Experience working with cloud infrastructure on AWS, Docker etc

Your Deliverables

At the end of your internship, you will deliver the following to OLX:

- A comprehensive project report for each project that you may have worked on, including all product or design documents as per the tasks assigned to you
- A detailed 1 hour final presentation to key stakeholders on the work done during your internship
- Anything else that is identified at the start of the project

Location: Gurgaon, Haryana
